Grade 3 · Add & Subtract

Answer key The answers are filled in.

1 Jae's class had some craft sticks. The class used 195 of them to make picture frames. Now Jae's class has 315 left. Which equation can be used to find c, the number of craft sticks Jae's class had at first?

Check one:

- ☐ 315 − c = 195
- ☑ c − 195 = 315
- ☐ 315 − 195 = c
- ☐ c + 195 = 315

2 Dev's class had some building bricks. Then the class got 357 more building bricks from another class. Now Dev's class has 762 building bricks. How many building bricks did Dev's class have at first? **405**

3 Ravi's class had some blueberries. The class ate 288 blueberries at snack time. Now Ravi's class has 327 blueberries. How many blueberries did Ravi's class have at first?

615

4 Leo's class had 719 building bricks. The class gave some building bricks to a younger class. Now Leo's class has 351 building bricks. How many building bricks did Leo's class give?

368
