larkit | Least common denominators

Grade 5 · Fractions

Answer key The answers are filled in.

1. What is the least common denominator of $\frac{3}{4}$ and $\frac{3}{8}$? **8**

2. What is the least common denominator of $\frac{1}{9}$ and $\frac{1}{12}$? **36**

3. What is the least common denominator of $\frac{1}{8}$ and $\frac{1}{12}$? **24**

4. What is the least common denominator of $\frac{1}{12}$ and $\frac{2}{3}$? **12**

5. What is the least common denominator of $\frac{5}{8}$ and $\frac{11}{12}$? **24**

6. What is the least common denominator of $\frac{11}{12}$ and $\frac{5}{6}$? **12**

7. What is the least common denominator of $\frac{7}{8}$ and $\frac{5}{6}$? **24**

8. What is the least common denominator of $\frac{9}{10}$ and $\frac{7}{12}$? **60**

9. What is the least common denominator of $\frac{7}{8}$ and $\frac{1}{2}$? **8**

10. What is the least common denominator of $\frac{5}{6}$ and $\frac{7}{10}$? **30**
