Line plots in eighths, tables and data questions

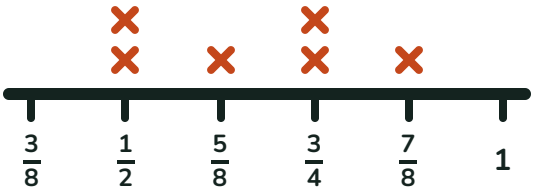

Grade 4 · Graphs & Data

Answer key The answers are filled in.

1 Make a line plot of the beads. Draw an X above the line for each length.

Lengths of 6 beads in inches:

$\frac{1}{2}$ $\frac{4}{8}$ $\frac{3}{4}$ $\frac{5}{8}$ $\frac{3}{4}$ $\frac{7}{8}$

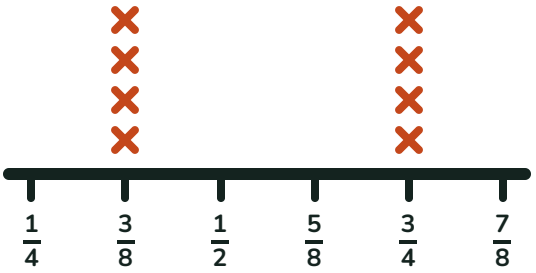

Bead lengths (inches)

2 Make a line plot of the seeds. Draw an X above the line for each length.

Lengths of 8 seeds in inches:

$\frac{3}{8}$ $\frac{3}{8}$ $\frac{3}{4}$ $\frac{3}{8}$ $\frac{3}{4}$ $\frac{6}{8}$ $\frac{3}{8}$ $\frac{3}{4}$

Seed lengths (inches)
