larkit | **Multiply fractions** Grade 5 · Fractions

Answer key The answers are filled in.

1 What is $\frac{12}{11} \times \frac{5}{11}$? $\frac{60}{121}$

2 What is $\frac{1}{8} \times 3$? $\frac{3}{8}$

3 Ava says $\frac{4}{5} \times \frac{5}{9} = \frac{36}{25}$. How did Ava get $\frac{36}{25}$?

Check one:

- [x] **Flipped the second fraction**
- [ ] **Added numerators, then denominators**
- [ ] **Multiplied numerators, then denominators**

4 What is $\frac{3}{4} \times \frac{16}{11}$? $\frac{12}{11}$

5 Mia says $\frac{1}{8} \times \frac{1}{3} = \frac{2}{11}$. How did Mia get $\frac{2}{11}$?

Check one:

- [ ] **Multiplied numerators, then denominators**
- [ ] **Flipped the second fraction**
- [x] **Added numerators, then denominators**

6 What is $\frac{15}{8} \times \frac{7}{9}$? $\frac{35}{24}$
